*Unscrewing
Devices For Molds*

 **SUPERIOR**
DIE SET CORPORATION

*Right Angle
Compact Units*

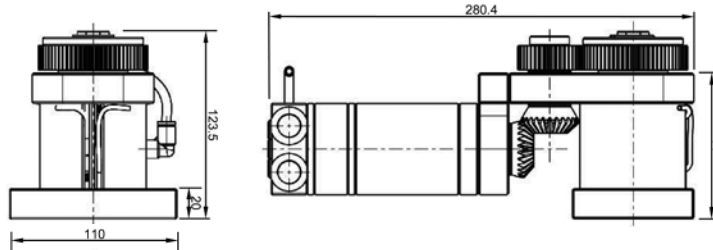

HOLE IN THE CORE SHAFT
 Install diverse options like -
 upstanding cores, core
 cooling tubes or blowing
 needles for making bottles
 or containers.

NEW - "NGTA" type compact unscrewing device shows its merits in two molding applications. The upstanding cores (marked red) are passed through the telescopic sleeve and secured against turning behind the unscrewing device. Unique thru-hole is ideal for threaded core cooling. (marked blue).
